Assignment Alumni LinkedIn Profile Searcher

Objective:

Develop a Spring Boot web application that allows users to search for LinkedIn profiles of alumni from a specified educational institution using the PhantomBuster API. The application should accept inputs for the university name, current designation, and an optional pass-out year. The retrieved alumni data should be saved in a database.

Requirements:

1. Backend Implementation:
    - Implement a RESTful API using Spring Boot to handle requests from the front end.
    - Create an endpoint that accepts the university name, designation, and optional pass-out year as input parameters and returns a list of alumni profiles.
2. Database Integration:
    - Set up a database (PostgreSQL) to store the alumni information
3. PhantomBuster Integration:
    - Utilize the PhantomBuster API to scrape LinkedIn data based on the provided inputs.

Expected API Details:

1. **Search Alumni Profiles API**

    Request URL: `POST /api/alumni/search`

    Request Body: `json`

```
{
  "university": "NAME_OF_THE_UNIVERSITY",
  "designation": "CURRENT_DESIGNATION",
  "passoutYear": "OPTIONAL_PASSOUT_YEAR"
}
```

Response Example: `json`

```
{
  "status": "success",
  "data": [
    {
      "name": "John Doe",
      "currentRole": "Software Engineer",
      "university": "University of XYZ",
      "location": "New York, NY",
      "linkedinHeadline": "Passionate Software Engineer at XYZ
Corp",
      "passoutYear": 2020
    },
    {
      "name": "Jane Smith",
      "currentRole": "Data Scientist",
      "university": "University of XYZ",
      "location": "San Francisco, CA",
      "linkedinHeadline": "Data Scientist | AI Enthusiast",
      "passoutYear": 2019
    }
  ]
}
```

2. Get Saved Alumni Profiles API (Optional)

Request URL: `GET /api/alumni/all`

Response Example: `json`

```
{
  "status": "success",
  "data": [
    {
      "name": "John Doe",
```

```
      "currentRole": "Software Engineer",
      "university": "University of XYZ",
      "location": "New York, NY",
      "linkedinHeadline": "Passionate Software Engineer at XYZ
Corp",
      "passoutYear": 2020
    },
    {
      "name": "Jane Smith",
      "currentRole": "Data Scientist",
      "university": "University of XYZ",
      "location": "San Francisco, CA",
      "linkedinHeadline": "Data Scientist | AI Enthusiast",
      "passoutYear": 2019
    }
  ]
}
```

Few things to take care of while submission of code:

- Assignment code submitted to be in Java
- The evaluation of the assignment will be based on code quality
- REST Compliant APIs, (No UI)
- Testable by Postman, (No UI)
- Will prefer classes properly refactored and following design patterns,
- Robustness in error handling
- Will Prefer TDD, JUnit
